

## Request to Northamptonshire Police

15<sup>th</sup> August 2025

*To close these gaps in the data, I am now contacting the individual police forces. For Northamptonshire, records are (partially) missing in the financial year(s) 2015/16, 2018/19 and 2020/21. Therefore, under the Freedom of Information Act I request the following information:*

*A Dataset (.ods, .csv or .xlsx) containing all police recorded hate crime offences recorded by the Northamptonshire police force in the financial year(s) 2015/16, 2018/19 and 2020/21 disaggregated by i) Community Safety Partnership (CSP) area, ii) motivating factor and iii) month. I.e. every row should show the total number of hate crimes committed by a certain motivating factor in a certain month in a certain CSP area. The motivating factors covered should include "Disability", "Race", "Sexual Orientation", "Religion" and "Transgender Identity".*

*I am formulating these very detailed specifications as this is the data structure provided to us by the Home Office (containing the columns "Financial Year", "Calendar Month", "Police Force", "Name", "CSP Name", "Motivating Factor", "Offence Count") and it is vital to our research that the data we are requesting from you corresponds with it.*

*Alternatively, should this make it easier for you to handle this request, we would also very much appreciate record-level data instead, i.e. Every Row reflecting one incident and the columns reflecting i) crime location (as CSP, municipality name or postcode; more precise details are not necessary), ii) Date (ideally with day, otherwise month and year) and iii) motivating factor.*

## Response

Please be advised that due to a change in our recording system in mid-2016, we expect that the number of hate crimes would likely be higher than shown for financial year 2015/2016.

We are unable to retrieve any information from our previous recording system but have provided the information that we have recorded for this year nonetheless.

Also, please be advised that more than one motivating factor (hate bias) can be present, where multiple have been recorded, they have all been provided.

Every effort is made to ensure that the figures presented are accurate and complete. The figures provided therefore are our best interpretation of relevance of data to your request, but you should be aware that the collation of figures for ad hoc requests may have limitations and this should be taken into account when the data is used.

Please note that these data should be interpreted with caution. Comparing numbers of incidents/crimes can be misleading and does not necessarily indicate the likelihood of someone being a victim of crime. In addition, the number of incidents/crimes recorded in an area over a period of time can be influenced by a number of factors. Consequently, statistics on incidents/crimes for one period may not necessarily be a good indicator of future incidents in that area.

If you decide to write an article / use the enclosed data, we would ask you to take into consideration the factors highlighted in this document so as to not mislead members of the public or official bodies or misrepresent the relevance of the whole or any part of this disclosed material.
